

Air View of Tulsa Municipal Airport, Tulsa, Okla.

AIR VIEW OF TULSA MUNICIPAL AIRPORT,
TULSA, OKLA.

Tulsa's Municipal Airport has been self-sustaining since its inception in 1928 and now has eight large hangars capable of housing 250 airplanes of all sizes. There are more miles of concrete runways on this airport than on any other airport in the United States.

All profit from airport operation has been returned to the aviation industry in the form of better improvements. This has resulted in Tulsa having one of the most modern airports in America and, at present, has the highest government rating obtainable.
